## Informații suplimentare

### Outstanding results

Bucovina Forestry College is the subject of the Romania Unfolds Documentary – Quality Education – produced by Veolia, launched in December 2024, with over 1 million 400 thousand views on YouTube. Episode 4 presents inspirational stories from the field of education, demonstrating that, through involvement, we can change the future of our children for the better. A prime example is the Bucovina Forestry College, which encourages academic excellence and practical training in the forestry field for its over 1,100 students, being the first college in the country to enter a team of girls in the European Forestry Skills Competition – an important step towards ensuring equal opportunities. In Romania, only 8.4% of technical education students benefit from on-the-job training, well below the European average of 60.1%, and Bucovina Forestry College has managed to develop individualized schooling programs for the integration and development of young people from various social backgrounds.
